business benefits - Technologies strand

Pobal Maps

A Gateway for Sharing Data and Working Smarter

John Manning - Pobal

Who are Pobal?

- Pobal is an intermediary that works on behalf of Government to support communities and local agencies toward achieving social inclusion, reconciliation and equality. Pobal is a not-for-profit company with charitable status
- Established in 1992 as Area Development Management
- Manages 15 programmes for various government departments/EU
- Programmes range from specific project remits (childcare, community services, rural transport) to equality measures and area based development programmes.
- In 2011, administered over €257 million to thousands of projects and community groups nationwide

What is Pobal Maps?

- Our GIS system is available freely on the Pobal website (www.pobal.ie)
- It has three main functions for Pobal, for our funded groups and for the public at large:
 - It provides precise boundary information (LCDP, RAPID, LA)
 - It is a tool for mapping our services (childcare, CSP) and providing information on those services
 - It allows the Pobal HP Deprivation Index to be viewed in a way that helps properly target disadvantage
- Pobal maps also functions as a reporting tool, allowing users to download census data and service information to a specific boundary

Boundary Information - RAPID

The screenshot displays the COMPASS 12 software interface. At the top, there are menu tabs for Home, Analysis, Search, and Reporting. Below these is a navigation toolbar with icons for Zoom In, Zoom Out, Pan, Full Extent, Previous Extent, Next Extent, Reset, and Magnifier. To the right of the toolbar are icons for Point Identify and Print Map.

On the left side, there is a Results panel with a tree view showing the following hierarchy:

- County
 - CO. DUBLIN
 - RAPID
 - Dublin - North West Inner City

The main map area shows a boundary line in purple. The boundary is labeled "DUBLIN - NORTH WEST INNER CITY" in two locations. To the right of the boundary, the text "DUBLIN CITY - NORTH EAST INNER CITY" is visible. A scale bar at the bottom left indicates 300m and 1000ft, with a scale of 1:10000. The coordinates 715631.445, 735167.490 are displayed below the scale bar.

At the bottom right, there is a copyright notice: "© Ordnance Survey Ireland. All rights reserved. Licence number E" and "© Pobal :: [Terms & Conditions](#) :: [System By Compass I](#)".

Service Information - CSP

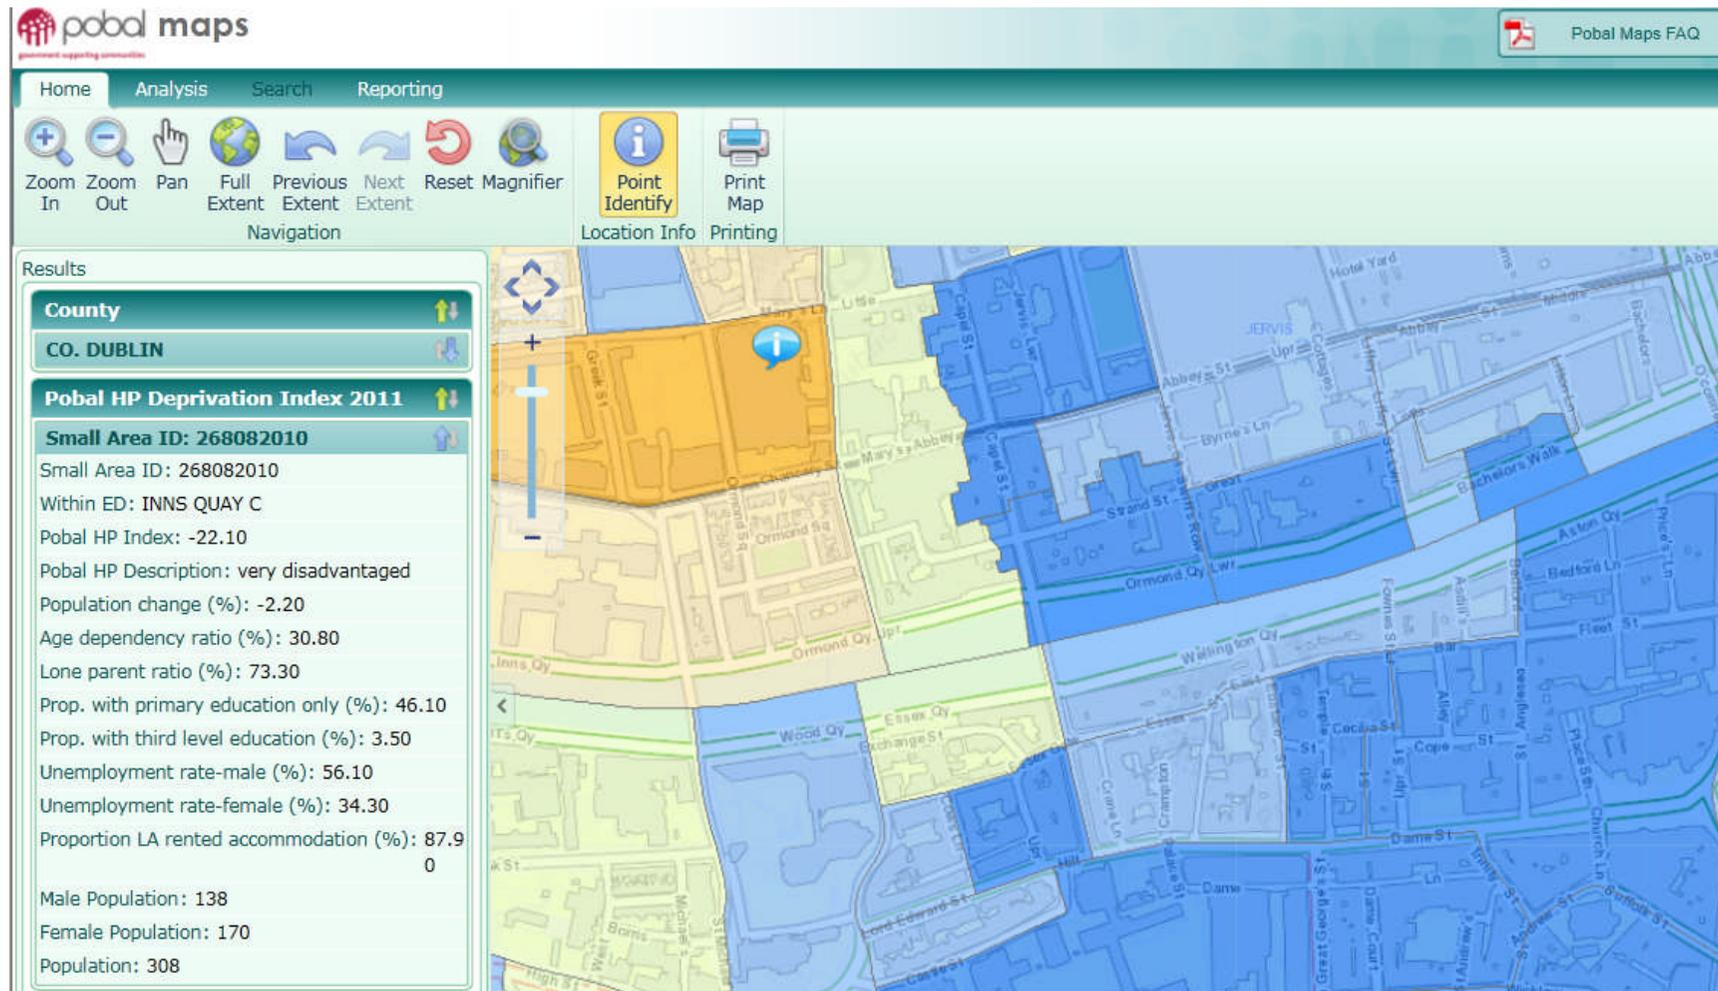

The screenshot displays the 'poba! maps' web application interface. The top navigation bar includes 'Home', 'Analysis', 'Search', and 'Reporting'. Below this is a toolbar with icons for 'Zoom In', 'Zoom Out', 'Pan', 'Full Extent', 'Previous Extent', 'Next Extent', 'Reset', and 'Magnifier'. A 'Point Identify' button and a 'Print Map' button are also present. The main map area shows a street map of Roscommon, Ireland, with a blue information icon placed over the town. A sidebar on the left, titled 'Results', contains the following information:

- County:** CO. ROSCOMMON
- CSP Programme:** RosFM Community Radio
- Name:** RosFM Community Radio
- Address 1:** Peter Triest Centre
- Address 2:** Athlone Road
- Address 3:** Unavailable
- Address 5:** Roscommon Town
- Address 6:** Co Roscommon
- Phone:** 090 6628161
- Email:** manager@rosfm.ie
- Website:** www.rosfm.ie

The Pobal HP Deprivation Index (2011)

- It is a requirement for most Pobal programmes to use the index to target the most disadvantaged areas
- Information on employment, education, housing, age dependency etc across 5 different censuses is provided
- Using this information a 'Relative Index Score' is calculated for each Electoral Division and Small Area
- These range from approx -35, being classified as an extremely disadvantaged area, to +35 being classified as extremely affluent
- This data is available as spreadsheets on the Pobal website, and is given visual form by Pobal maps

Deprivation Index – Small Area

Small Areas

- The previous smallest geographical unit for this measurement was Electoral Division (ED)
- These were problematic for consistent relative scoring, as the smallest ED contained just 70 persons, with the largest holding over 32,000
- Comparing scores between such vastly ranging population sizes was therefore not a reliable planning tool
- In 2008 Pobal was the first to use the new Small Area (SA) dataset
- These contain a minimum 65 households (to maintain confidentiality), and an average of 90 households. The country is split into approx 18,000 SAs
- As these are much more consistent in population size, and also being smaller geographically, they allow a much more targeted approach to highlighting and tacking disadvantage

Why does Pobal need GIS?

- It is a monitoring requirement for our Rural Transport Programme (RTP) projects to plot their bus routes, this is why Pobal initially began the project. RTP maintain a separate parallel system, restricted with user logins
- Grew from this becoming a useful tool for plotting the location of our projects, for geographical analysis, planning audit/inspection visits
- For larger programmes with hundreds of funded projects, it provides a contacts and networking database
- The reporting function saves the company time, allowing users to run their own queries
- The main reason is the SA targeting. A spreadsheet of over 18,000 coded small areas cannot be interpreted without visual representation.

Reporting – Dublin City area

Electoral Division(s) within selected boundary

Electoral Division Definition:

Electoral Divisions (EDs) are the smallest legally defined administrative areas in the State of Ireland for which Small Area Population Statistics are published from the Census.

ED Name	ED ID	Population 2006	Population 2011	Deprivation Score 2006	Deprivation Score 2011	Population Change 2006	Population Change 2011	Age Dependency Ratio 2006	Age Dependency Ratio 2011	Lone Parents Ratio 2006	Lone Parents Ratio 2011	Proportion with Primary

What this means for ourselves, our funded groups, and the general public

- As a freely available resource, the system has been used as a planning, targeting or research tool by students, government bodies and charities
- For programmes such as our Childcare Programme (4,000+ projects), it serves as an important service, contact and information sharing tool
- For our funded groups there is easy access to reliable deprivation data in their locality, justifying their funding allocation
- For Pobal, it is an invaluable tool in appraising applications and annual plans, to ensure that funding is appropriately used
- It allows us to justify the existence of our programmes to government, by clearly demonstrating that projects target the areas most in need

The End

Thank you!
